

Figure 1 is a schematic diagram illustrating the experimental setup for studying the effect of the initial concentration of the polymer solution on the morphology of the polymer blend. The diagram shows a cross-section of a polymer blend, which is divided into a central core and an outer shell. The core is further subdivided into 'Core (P1)' and 'Core (P2)', while the shell is subdivided into 'Shell (P1)' and 'Shell (P2)'. The diagram also indicates the 'Initial concentration of the polymer solution' and the resulting 'Morphology of the polymer blend'.
